

Part 2 – Dashboards Breakout groups

Dashboards – tracking indicators for climate adaptation planning

Breakout group by sector

1. Agriculture
2. Health
3. Urban
4. Water (availability, flood,..... Maybe coastal)

Climate data experts – your choice.....

Questions for discussion

1. Would dashboards be useful to your efforts?
2. What indicators would you want to track on a dashboard?
3. What key data for resilience planning are difficult to get?

Create

Find, collect and share climate-relevant data from different sources in one place

The next phase of the PREP platform will enable users to create personalized dashboards of climate risks that combine top-down data with local information. Upload your own data or pull in data from
